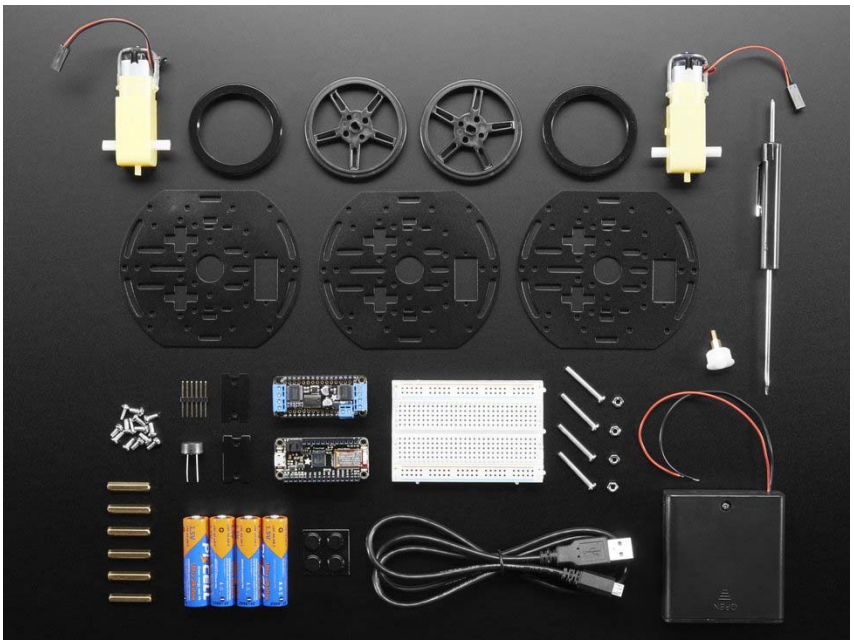
AdaBox002 – Making Things Move - Feather Bluetooth LE Mini Robot

PRODUCT ID: 3235



Description

Please note! This is NOT the subscription version of AdaBox! This is *ONLY* AdaBox002 that shipped out to AdaBox subscribers in December of 2016. This version does not include free shipping, the lithium ion battery, or AdaBox subscriber exclusive pin. If you'd like to subscribe to AdaBox, please visit the AdaBox page!

AdaBox002 - Feather Bluetooth LE Mini Robot Rover (Making Things Move) is the perfect gift for folks who are just getting started in the world of DIY electronics. It's an excellent introduction to our wide world of robotics and a great way to test the waters of AdaBox before committing to a subscription.

This project contains just about everything you need to make your very own Bluetooth controlled mini-robot! You get a Feather Bluefruit LE (Arduino compatible microcontroller with Bluetooth LE radio), motor control wing, three-layer round robot chassis, two motors, two wheels, a battery pack + 4 x AA batteries, breadboard and even a little speaker to let your robot sing! All you need is a ~500mAh LiPoly battery sold separately.

Everything is plug-and-play - No soldering required! Use any iOS or Android phone with our free Bluefruit Connect app to control your robot friend after it's been built.

If you're an international customer, this is currently the only way to get an AdaBox (for now - we're working on it!) and if you're a subscriber who missed out on boxes one and two, a great way to spend your time as you anxiously await ADABOX 003.

This kit DOES NOT include the collectible pin, lithium ion battery, or free shipping.
